What, if anything, do you like most about the recommended guidelines and proposed projects for the Walking District?

That we're connecting commercial and residential, which will make San Ramon more walkable.

ConnectivityCohesive design guidelines throughout the areaLong term vision

I like the idea of separating the walkways and setting them away from roads. The addition of signage and public art is attractive as well

loop not attached to a major roadway

Expanding routes for safety and exercise

The connectivity in our downtown cooridor to the IHT, civic center, retail.

Layers of paths and routes

Too general at the moment. Would like a clearer idea about options.

Pathways not aligned on streets, more privacy

16

What, if anything, do you like most about the recommended guidelines and proposed projects for the Walking District?

Ensuring the walking paths are interesting and not just straight lines

Separating Sidewalks is REALY important for safety and views

Incorporating areas where biking and walking can take place safely

Public Art!

Modifying existing walkways to be a standard width; some existing paths are sufficient

I feel the proposed loops may lack walkability interest

I feel the loops may lack enough walkability interest?

16

What, if anything, do you not like about the recommended guidelines and proposed projects for the Walking District?

More information on lighting

There must be a connect into BR 6 that runs through the middle of it to Norris!

Would like to see more trees and landscaping for pollinators

More improvements on IHT

I'd like to see a greenbelt that goes along side the paved walkways. like at Inverness Park

The initial footprint of City Walk walking paths appears to be dictating overall feel. Not enough curves or bends

Too general. Would like more specific options. Sorry, this got put in my prior answer. I like the idea we're connecting commercial and residential.

Connection to BR6's new development

Connect to BR 6
